GEIST Winter of Code

We work for students as their tutors on many different courses, but what is our real goal is to work **with** them!

Every year we look for ambitious students, who want to gain more knowledge and experience that it is offered on standard courses.

Most talented students will be able to:

- Gain knowledge and experience in the area of Artificial Intelligence that is not available on regular courses
- Take part in building **Intelligent Mobile Technologies** laboratory and have access to **smarphones**, **tablets**, **augmented reality glasses** and many other devices!
- Work on their master or bachelor thesis and get paid for that
- Meet many famous people from the Artificial Intelligence society
- Implement their solutions in commercial products
- Continue their education on PhD studies
- Travel around the world
- Have a lot of fun 😉

In exchange, we expect that students will:

- Be full of positive attitude
- Want to work (hard)

Winter of code 2012/2013

Meeting with interested students: 19.12.2012 C2, 316.
